Janet did an awesome job.... As the DRA call, Deb T shared with the DRAs the Administrator had sent a memo instructing RAs all regions immediately cease any investigations at mines and tailing facilities. FYI--in case you receive Qs asking about memo. Best, khanna-I'm going to sign off very soon.

**12noon DRA call highlights Aug. 12**

Data call/inventory from R8,9,10 before administrator goes to Japan. Inventory accelerated due to Gold King Mine ww release. Administrator met with Gov. Hickenlooper re: CO's abandoned 20K mines. At end of call, Deb T provided update on Animas. Data is suggesting toxins/metals returning to pre release levels. State monitoring fish. So far no fish kills. Do not anticipate opening Durango River till Aug 17. Still -- 3 states, two tribes impacted, 3M gallons. Regardless of "good" news....we do not know impact.

Sam C suggested it would be useful as regions look at abandoned tailing mines to consider all states that could be impacted and to let other regions know.
